

HPI-35-02

Hendrix Tie Top Insulators are molded from a proprietary blend of gray, track and UV resistant, high density polyethylene. They are more durable and reliable than traditional wet-process porcelain insulators. They are also lighter, safer and easier to handle.

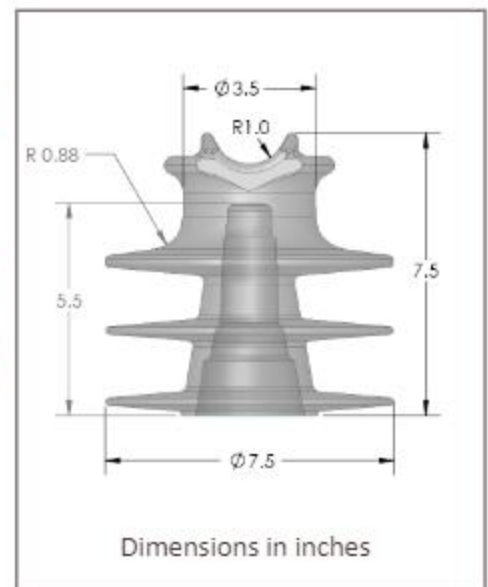

The HPI-35-02 is designed with standard ANSI neck and thread size. It is a direct replacement for medium-voltage porcelain J-neck insulators and recommended for all conductor types, bare or covered.

- Exceeds ANSI electrical and mechanical requirements
- Resistant to impact damage, breakage and vandalism
- Designed for use with all Tie Products
- Made in USA
